DISCOVER MONTECRISTI DOMINICAN REPUBLIC

As you approach Monte Cristi, Dominican Republic, the nature around starts to change from tropical flamboyant to dry and scarce, and your typical tourist scenario changes to a very local flavor.

In front of miles of a beautiful, untapped, coastline rises El Morro, a large geological landmark, resembling a large flat pot made of clay.

Montecristi offers its few visitors with pride its yellow flowers and butterflies, a tranquil environment of fishermen and country people, warm hospitality and the sunniest, driest climate in the Dominican Republic

Montecristi was one of the first territories of America seen and registered by Columbus and his team. One of the first mentions of the island, refers to El Morro and its magical surroundings. It was originally settled by families from the Canary Islands, and then suffered a series of geopolitical shifts, until it became officially a Province in 1907.

It's located to the North of the Island, to the most oriental side, for a semiarid environment, dry and windy. Has a traditional big population of goats and its pintoresque yellow butterfly, which makes a lovely natural spectacle on your way there. Its main economical activities are agriculture, fishing and farming of small cattle. That makes up a peculiar gastronomical features, tasty and rich.

Montecristi has a beautiful Carnival tradition, very singular and extraordinarily symbolic. Magic-religious symbols of purifications, of value, of machismo, of relations, give a unique identity to this carnival.

A small town, though very welcoming and quaint, that will give you a sense of a place that hasn't changed much in 125 years.
